EDUCATION

Kenzie Academy Brasil, Full-Stack Web Development | Oct 2022 – Oct 2023

UniSociesc, Digital Game Programming | Feb 2023 – May 2026 (completed)

PROFESSIONAL EXPERIENCE

Systêxtil – Full-Stack Developer

Dec 2025 – Present

- Development and maintenance of a legacy system using NXJ (Java 1.4), Oracle and APEX, focusing on bug fixes, continuous improvements and operational stability.
- Participation in platform modernization and migration to React, Java and Spring Boot, with a focus on application consistency, agility and security.
- Contribution to the development of **Global Allocation**, a solution that uses information from databases across multiple countries to allocate products already manufactured, in production or planned for production. The feature factors in production and delivery lead times to forecast product availability by date before a sale, supporting commercial planning and optimizing factory sales.

Seti Tecnologia – Mid-Level Full-Stack Developer

Jun 2025 – Nov 2025 | Software as a Service (SaaS), IT Asset Management

- Development of geolocation features for the internal agent (Go), enabling corporate computer tracking.
- Implementation of a feature enabling the agent to automatically capture and store BitLocker recovery keys, simplifying recovery of encrypted drives for customers.
- Planning and delivery of a global error-logging module, including event logging with aspect-oriented programming (AOP) on the backend and a dedicated monitoring dashboard on the user interface (Vue 3 + PrimeVue).
- Collaboration on integrations between the backend application (Java 21, Spring Boot), the agent (Go) and the remote access application (Rust, a solution similar to AnyDesk).

Almode Sistemas – Full-Stack Developer

Jun 2023 – Jun 2025 | Software as a Service (SaaS), Retail Point-of-Sale System

- Maintenance of the company's SaaS point-of-sale (POS) solution, focusing on NF-e electronic invoice issuance and inventory control.
- Development of user interface features (Vue 2, Vuetify, TypeScript) and REST APIs (Java, Spring Boot).
- Refactoring of credit card fee logic to ensure tax accuracy and prevent inconsistencies in sales orders.
- Development of a goods-checking feature that reduced inventory discrepancies by 70%.

Jaraguá Truck Implementos Rodoviários – Administrative Assistant

Sep 2016 – Nov 2021

- Work across several departments (Sales, Production, Logistics, Finance and E-commerce).
- Progression from document organization to storeroom logistics, production support and leadership of the e-commerce operations team.
- Acquisition of extensive experience in process optimization, quality checks and team coordination.
